

Navraj Singh Kalsi

Full Stack Developer | Data Analyst

Hyderabad, India | +91-9963376432 | navrajkalsi2005@gmail.com | linkedin.com/in/navraj-singh-77855528b | github.com/RedPanda-08 | portfolio-navraj.netlify.app

Summary

Full Stack Developer and Data Science student working across backend systems, ML pipelines, and data-driven interfaces. Software Developer at a healthcare startup and building AI/ML projects spanning forecasting, dashboards, and image processing.

Skills

Languages: JavaScript, Python, Java, SQL (MySQL)

Backend/Frontend: Node.js, Express.js, React.js, Next.js, Tailwind CSS, REST API Design

Data/ML: Pandas, NumPy, Transformers (SecureBERT), GRU/LSTM, MC Dropout Uncertainty Estimation, OpenCV

Database: MongoDB, MySQL | Tools: Git, GitHub, Postman, Kaggle, Jupyter

Experience

Software Developer, Arogya Vitra (Startup)

React, TypeScript, Zustand, Java Microservices

- Own the patient dashboard and profile UI, integrating 6 backend microservices into one patient-facing portal
- Drove UI decisions on data hierarchy and field-editability that shaped the app's design system

Projects

ContentAI — AI Content Generation Platform

Next.js, FastAPI, Supabase, OpenAI API

- Shipped a full-stack platform end-to-end: secure auth, real-time editing, AI-driven content APIs

Epistemic Uncertainty-Aware Exploit Forecasting (Capstone)

SecureBERT, Multi-task Learning, GRU/LSTM

- Built a multi-task transformer pipeline with MC Dropout uncertainty estimation for dark-web threat intelligence, using data from 3 sources

ACIS — Ancient Civilization Intelligence System

Python, Streamlit, Plotly, Pandas

- Built an interactive dashboard with a 5-filter system and CSV export for UNESCO World Heritage analytics

Medical Prescription Image Preprocessing Pipeline (Startup)

Python, OpenCV, Kaggle

- Built a preprocessing pipeline with 3 fallback corner-detection methods to deskew and clean tilted prescription photos

Open-Source Experience

Contributor, Social Summer of Code (formerly Script Foundation)

- Fixed issues and shipped feature improvements across open-source repositories
- Collaborated via Git/GitHub workflows: pull requests, code reviews, debugging

Education

B. Tech, Computer Science (Data Science), Malla Reddy University, Hyderabad — 2023-2027, CGPA 7.96

Class 12 (CBSE), Loyola Academy Junior College, Alwal — 89%

Achievements

- IBM Data Science Professional Certificate — Coursera (80% complete)
- Design and Analysis of Algorithms — NPTEL (Elite Batch, 60%)
